

**Snowboard Camp**  
**Utah Olympic Park Airbag training**

**When:** July 23-26<sup>th</sup> 2019  
September 13-15<sup>th</sup> 2019

**Why Airbag training:** Because we have the opportunity to go train on a state of the art airbag that will help us progress in a safe environment.

**What:** We will head to Park City 2 times this summer to train on the airbag. We get to ride our actual snowboards down a synthetic snow surface to hit an airbag with a sloped landing. The sloped landing makes you feel like your landing on a cloud. Participants must be comfortable on medium sized jump features.

**How Much:**

July Camp \$550 (12 hrs on the bag)  
September Camp \$450 (8hrs on the bag)

Camp includes transportation, lodging, coaching, bag time, and food at the house. Food while driving is the athlete's responsibility. We will have approximately 2 lunches and 1 dinner on the road.
