

Woodward Airbag

With the lack of foam pits and powder this season we are still looking for ways to bridge the gap between trampolines and park features. Now that it is spring time, Woodward is bringing their airbag back out. The Woodward airbag is a smaller bag that is good for kids who are working on small jumps or just started clearing medium size jumps. It is also good for kids who are working on their first inverts or tricks up to about 540.

We have reserved time on the airbag for Sunday March 7th. Cost is \$40/snowboarder.
